

# Important Check List For Papamoa Kennels & Cattery

## VACCINATIONS

These need to be current and must be given at least one week prior to coming into kennels. If vaccinations have not been given regularly and they are overdue, there may be a longer stand down period required so please contact the kennels if you are unsure.

**Please bring the vaccination book** in to allow us to sight current vaccination status of your animals.

## VACCINATIONS REQUIRED

**CATS** – Please note, we require vaccinations to be annual to come into our cattery.

Two types of core vaccines available – all cats must have **one** of these **every** year

1. Felocell 3 or 4
2. Tricat

### Protocol for cat vaccines (same for both types)

- INITIAL COURSE (Kittens or previously unvaccinated cats, 2 or 3 doses, Kittens between the ages of 6-16 weeks, or adults). Boosters 3 – 4 weeks apart, no more than 6 weeks
- FIRST ANNUAL: An additional shot is required either at 12 months of age or 12 months after the last shot, this completes the initial course
- BOOSTERS: After the initial course, annual vaccinations are required

## DOGS

### A. 5 n 1 (core vaccine)

Two main brands of **CORE VACCINES** (all dogs must have) available to cover Parvovirus, Distemper and Adenovirus

1. VANGUARD 5 OR VANGUARD PLUS 5
2. DHPPi or DHP

**All dogs must have one of the these as per below**

### Protocol for VANGUARD 5: ( Usually Adult Dogs )

- INITIAL COURSE: Two vaccinations, Initially, Boosters 3 – 4 weeks apart
- BOOSTERS: Adults: Annual required

### Protocol for VANGUARD PLUS 5: ( Usually Puppies )

- INITIAL COURSE: Three vaccinations, 3 - 4 weeks apart from 6 weeks of age, (16 week finish)
- FIRST ANNUAL: 12 – 16 months: One Shot
- BOOSTERS: Adults: One Shot up to every 3 years (May be given annually, 2 yearly, or 3 yearly)

### Protocol for DHPPI and DHP

- INITIAL COURSE: Puppies: 2 – 3 vaccinations – last dose can be given 10 weeks or Over, 3 – 4 weeks apart
- FIRST ANNUAL: 12 – 16 months: One Shot
- BOOSTERS: Adults: One Shot every 3 years

### B. CANINE COUGH VACCINE

Two types of **CANINE COUGH** vaccines – all dogs **must** have this

1. Injectable (Killed)  
CANIGEN KC  
CANVAC CCI
2. Intranasal (Live)  
NOBIVAC KC  
PROTECH BRONCHISHIELD I, II, or III
3. Oral KC

### Protocol for Injectable CC

- INITIAL COURSE: (Puppies or new dogs): Two vaccines 3 – 4 weeks apart, from 6 weeks
- 12 – 16 months: One Shot
- BOOSTERS: ANNUAL BOOSTERS MUST BE GIVEN

### Protocol for Intranasal CC

- INITIAL COURSE: Puppies: One vaccination 8 weeks or older
- BOOSTER: 12 – 16 months: One Shot
- BOOSTER: Adults: Annual boosters required

### Protocol for Oral KC

- One vaccination from 8 weeks, then annually

**Please note: if your dog has had Intranasal vaccines every year but the most recent CC vaccine was Canigen KC or Canvac BB, if they haven't had a booster of this injection 3-4 weeks later, they are incorrectly vaccinated and you need to contact your Vet to find out what to do.**

**Stand Down Periods** Only required if vaccines have lapsed ( over 1 month ) or are new (puppies)

- All injectable vaccines – 7 days after the last vaccine of a course given
- All intranasal or oral vaccines – 5 days after vaccination has been administered

**NO EXCEPTIONS!**

## **BEDDING AND TOYS**

You are welcome to bring in bedding for your dog or cat, but please ensure it is machine washable and labelled (we endeavour to have all bedding as clean as possible when your pet goes home).

Alternatively we have plenty of bedding so feel free to leave yours at home.

You are welcome to bring in a favourite toy – these will be left in the kennel when your dog is out playing with their friends so there are no arguments over who is playing with it!

## **FOOD**

If your pet is on a special diet please bring this with you and we will ensure it is fed as per instruction from you. Many of our four legged friends are on special diets for allergy reasons or other serious medical conditions, so the staff at Papamoa Kennels & Cattery are trained in the importance of this and we have set procedures in place to ensure your pet receives the correct food and amount.

## **MEDICATION**

If your pet is on medication please let the staff know all the details on arrival of dosage and frequency and we will ensure the medications are given as per instruction.

We appreciate how important medications are (some being life threatening if not given correctly) so we take this very seriously.

Please be aware that there is a medication charge.
